GOURMET LIQUID ANT BAIT

HONEYDEW FORMULA WITH UNI-TRACT II™
 UNI-TRACT II™ is an insect attractant proven to enhance bait acceptance by a variety of sweet and protein feeding ants.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. **Notice:** Buyer and user assume all the risk and liability of use, storage and/or handling of this product not in accordance with terms of this label.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal of this product. **Storage:** Store product in original container in a cool dry place out of reach of children. Do not allow product to freeze.

Disposal: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Do not contaminate feed or foodstuffs. Place baits in areas inaccessible to children and pets.

To control ants and roaches, use indoors and outdoors near: homes, apartments, boats, cruise ships, condominiums, schools, hospitals, institutional and commercial buildings, nursing homes, hotels and warehouses. For use inside restaurants, grocery stores, food processing plants, use only in bait stations, or by placing bait into cracks and crevices.

Gourmet Liquid Ant Bait® may be used at full strength. Bait may be used in 'Ant Café', 'Ant & Roach Buffet', 'KM AntPro', 'Ant Café RTU' (Ready To Use) or 'Ant & Roach Café RTU' or other similar bait stations.

Ant & Roach Café RTU Bait Station Instructions: 1 To activate Ant & Roach Café RTU Bait Station, place station on a flat surface with the cone facing up. If cone is filled with liquid, move station from side to side rapidly and liquid will leave the cone. 2 With a knife or scissors, cut the top of the cone, so that 3 the top of the remaining cone is level with top of surrounding circular surface.

Place bait station according to label directions. Place bait station on a horizontal surface near ant activity. Place stations under food cabinets, sinks, stoves, refrigerators, food storage areas, attics, garages, basements, storage areas, closets, etc. Place on exterior window sills and in doorways to help prevent entry of ants. Some bait stations may be designed to be affixed to a wall, hung on pipes or branches, or placed on a flat surface.

When using bait stations, wash hands thoroughly before handling to remove any odors that may be repellent to ants, i.e. tobacco, garlic, strong chemicals/cleaners, etc.

Ants are attracted to and will feed on Gourmet Liquid Ant Bait® until they die. The bait is designed to work slowly and sufficient bait should be made available for at least 14 days of continuous feeding. The ants will return to their nests after consuming the bait and will feed their young and the queen, destroying the colony. Repeat placement of the bait until satisfactory control has been achieved.

Do not use sprays, foggers or any strong chemicals or cleaners near the bait containers or placements. This may contaminate the bait and cause the insects to cease feeding.

PRECAUTIONARY STATEMENTS

Hazardous to humans and domestic animals.

Harmful if swallowed. Causes eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

FIRST AID

If inhaled Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further advice.

If on skin or clothing Rinse skin with plenty of water for 15-20 minutes; take off contaminated clothing. Call poison control center or doctor for additional treatment advice.

If in eyes Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-877-483-4997 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS

Do not apply directly to water. EPA Reg. No. 73766-2
